

Description

SLIMPAR LED floodlights represent a compact and economical lighting solution for all types of private or professional indoor events. Available in QUAD (RGBW) or HEX (RGBW + Amber + UV) version and available in several models of 5, 7 and 12 LEDs of 10W, the SLIMPAR have a compact profile ideal for situations where space constraints are strong, while offering a wide angle of diffusion of 60°. Versatile, they are able to operate automatically and follow the rhythm of music, or be controlled via a DMX controller and the supplied infrared remote control. The installation of the SLIMPAR is very easy thanks to its double bracket which facilitates its installation on the ground and its passive cooling.

Features

- Stand-alone programming : Yes
- Type of use : [al_evsc]
- Additional Specs :
- Light sources: 5 x 10W RGBW LEDs
- Beam angle: 60°
- Modes: Auto, Music-controlled, Master/Slave and DMX
- Number of DMX channels: 8
- DMX input/output: XLR 3-pin
- Display: digital display with 4 control buttons
- Frame: aluminium
- Supply voltage: 100-240V, 50/60Hz
- Power consumption: from 25W to 50W, depending on the model
- Cooling : passive
- Weight and dimensions: 1.5kg, 225 x 70 x 220mm
- Protection class: IP20 (indoor use)
- Supplied with power cable and velcro cable tie, double yoke mounting bracket and IR remote control
