

## Description

The NEBEL 1500 is a heavy duty smoke machine that is surprisingly easy to use. It is compact and mounted on wheels for easy transport and mobility.

Equipped with a 1 liter liquid tank and a 3.8 liter water tank, it will only take 8 minutes to heat up this little wonder to cover the space with a thick smoke on the ground during your indoor events such as weddings, private parties, parades, concerts... Its control panel allows different modes and settings (intervals and durations of triggers, auto timer, projection force and volume of smoke output) easily programmable via the LCD display.

Powered by a Powercon connector, the NEBEL 1500 also has a DMX remote control, not to mention the HF remote control that allows you to trigger smoke with a simple touch.

## Features

- Type of use : [al\_evsc]
- Additional Specs :
- Heater power: 1500W
- Heat-up time: about 8 minutes
- Tank capacity: 1 litre
- Fluid level view window
- Flow rate: 2000m<sup>3</sup>/min
- Water tank capacity: 5 litres
- Display: LCD screen with 7 control buttons
- Modes: Manual, HF remote control, DMX, timer
- Number of DMX channels: 2
- DMX input/output: XLR 3-pin
- Power consumption: 1500W
