

Description

The IP-PAR-1212-HEX is an LED spotlight specifically designed for outdoor use. Its IP65 certification fully protects it against water projections and dust, enabling installation in the most demanding environments. Its 12 x 12W LEDs enable RGBWA+UV colors to be precisely mixed and diffused over a 40° angle. Perfect for easily creating ambience on buildings or at any outdoor event, this outdoor LED spotlight is capable of operating in automatic mode, reacting to ambient music, being controlled via a DMX controller or master device, and can also be set via the control panel on the back of the machine.

Features

- Additional Specs :
