

Description

The H1500-PRO haze machine is housed in a sturdy flight case for easy transport and will quickly become indispensable for enhancing your light shows. Discreet, with a maximum flow rate above 1000 m³ per minute, low fluid consumption of approximately 12ml per minute and a heat-up time of about 50 seconds, the H1500-PRO will prove to be highly efficient in many possible applications. The H1500-PRO is a must for private parties and festive event venues. It offers different operating modes and numerous settings (trigger intervals and durations, auto timer, smoke volume output, fan speed), all DMX controllable or from the control screen with LCD display. Algam Lighting recommends using haze fluid.

Features

- Type of use : [al_evsc]
- Additional Specs :
- Heater power: 1500W
- Heat-up time: 50 seconds
- Tank capacity: 5 litres
- Empty tank detector
- Fluid consumption: 12ml/min when the flow rate is 100%
- Display: LCD
- Modes: Timer/Manual/DMX
- Number of DMX channels: 2
- DMX input/output: XLR 3-pin
- Power consumption: 1500W
- Compatible fluid: use Haze fluid
- Weight and dimensions: 480 x 280 x 255mm
- Protection class: IP20 (indoor use)
- Supplied with Powercon power cable
