

Description

Given its 600W power, the H600 is a surprisingly compact haze machine that will enhance your light shows with its dense and steady haze production. Its robust steel construction, its large 1.2-litre tank and its record heat-up time of 40 seconds make it the ideal haze machine for private parties or all events in medium-sized rooms. The H600 offers different operating modes and numerous settings (trigger intervals and durations, auto timer, smoke volume output, fan speed), all DMX controllable or directly from the wired remote control with LCD display. For an optimal result, Algam Lighting recommends using haze fluid.

Features

- Type of use : [al_soevsc]
- Additional Specs :
- Heater power: 600W
- Heat-up time: 40 seconds
- Haze flow rate: 250m3/min
- Tank capacity: 1.2 litres
- Display: LCD
- Modes: Timer/Manual/DMX
- Number of DMX channels: 2
- DMX input/output: XLR 3-pin
- Power consumption: 600W
- Compatible fluid: use Haze fluid
- Weight and dimensions: 3.7kg, 290 x 185 x 240mm
- Protection class: IP20 (indoor use)
- Power supply: 240VAC 50/60Hz
- Supplied with power cable and HF remote control
