

Description

The H900 is a 900W haze machine that will enhance the effects of your light shows by producing a dense and steady haze. Its robust steel construction, large 1.2-litre tank, and record heat-up time of 40 seconds make it the ideal haze machine for private parties, clubs, and bars. The H900 offers different operating modes and numerous settings (trigger intervals and durations, auto timer, smoke volume output, fan speed), all DMX controllable or from the control screen with LCD display. You can also trigger haze remotely using the included wireless remote control. For an optimal result, Algam Lighting recommends using haze fluid.

Features

- Type of use : [al_evsc]
- Additional Specs :
- Heater power: 900W
- Heat-up time: 40 seconds
- Haze flow rate: 340m³/min
- Tank capacity: 1.2 litres
- Display: LCD
- Modes: Timer/Manual/DMX
- Number of DMX channels: 2
- DMX input/output: XLR 3-pin
- Power consumption: 900W
- Compatible fluid: use Haze fluid
- Weight and dimensions: 5.2kg, 310 x 260 x 250mm
- Protection class: IP20 (indoor use)
- Power supply: 240VAC 50/60Hz
- Supplied with power cable and HF remote control
